

## EIT Knowledge and Innovation Communities: EIT RawMaterials

03.08.2021 | Netzwerke in Forschung, Technologie und Innovation

<https://eitrawmaterials.eu/>

The Knowledge and Innovation Communities of the European Institute of Innovation & Technology (EIT) are partnerships that bring together businesses, research centres and universities. They allow:

- innovative products and services to be developed in every area imaginable, including climate change, healthy living and active ageing,
- new companies to be started,
- a new generation of entrepreneurs to be trained.

EIT RawMaterials is the largest consortium in the raw materials sector worldwide. Its vision is to develop raw materials into a major strength for Europe. Its mission is to enable sustainable competitiveness of the European minerals, metals and materials sector along the value chain by driving innovation, education and entrepreneurship.

There are six regional Innovation Hubs in Belgium, Finland, France, Italy, Poland and Sweden, called Co-Location Centres (CLCs) that represent different regional ecosystems connecting industry, research and education.
