

## HYVOLUTION - Internationale Wasserstoff-Konferenz zu Energie, Industrie und Mobilität

<https://www.fchobservatory.eu/news-events/hyvolution>

Zeitraum: 04.05.2021 - 05.05.2021 Ort: Paris Land: Frankreich

HyVolution is a growing international hydrogen event in France for energy, industry and mobility. Over two days more than 2000 international participants are expected: production, distribution, storage, services - every solution for all carbon-free hydrogen markets.

Two days of conferences around:

- national and European market information through experience debriefs and round tables
- contacts and relations facilitated by free service for arranging appointments: H2 Meetings.

HyVolution brings together all stakeholders involved in the growing Hydrogen market. Industrial, manufacturers, service providers, institutions and local authorities all come along to present their solutions to project coordinators.

With the pandemic crisis still ongoing, the health of exhibitors, employees, partners, and visitors remains a major priority. That's why together with France Hydrogène, the organisers have decided to reschedule the 2021 edition of HyVolution to take place on 4th-5th May, 2021 in the Paris Event Center (PEC) at Paris-La Villette.
