Erscheinungsdatum: 21.11.2019 | Länderberichte und -studien, Strategiedokumente

The high availability of renewable energy in Brazil allows the country to build new business opportunities by exporting green hydrogen and contribute to the CO2 reduction goals of other countries in Europe and Asia which less access to renewable resources.

In this context, the following strategy paper “Green Hydrogen and Fuel Cells in Brazil: Context Overview and Outlook” should contribute to the further development of the green hydrogen technology and market, analyzing the technology status in Brazil, the political and social environment, as well as the opportunities and challenges for the implementation of this new and promising technology.
