

## Research Council of Norway: Measuring the results of user-driven research 2012

Erscheinungsdatum: April 2014 | Innovation: Analysen

The report *Resultatmåling av brukerstyrt forskning 2012* (Measuring the results of user-driven research 2012) presents the results from surveys of Innovation Projects in the Industrial Sector supported by the Research Council of Norway (RCN). The results are related to indicators for the measure of socio-economic impacts for the portfolio of projects, and include indicators on the development of expertise, knowledge dissemination, commercialization and input additionality.

The report is published in Norwegian, but contains an English Extended Summary (p. 5-13).

Quelle: Research Council of Norway

Redaktion: 07.07.2014 von Tim Mörsch, VDI Technologiezentrum GmbH

Länder / Organisationen: Norwegen

Themen: Wirtschaft, Märkte, Innovation
