DFG: Weave Lead Agency Initiative - Zusätzliche Möglichkeit zur Zusammenarbeit mit dem polnischen National Science Centre (NCN)

https://www.dfg.de/foerderung/programme/inter_foerdermassnahmen/antragstellung_weave_verfahren/index.html

Stichtag: Antragstellung jederzeit möglich | Programmausschreibungen

Das Weave Lead Agency-Verfahren wurde entwickelt, um exzellente grenzüberschreitende Verbundforschung zu unterstützen. Durch einen einheitlichen Begutachtungsprozess werden Einreichungs- und Auswahlverfahren für Verbundforschungsanträge, an denen Forschende aus bis zu drei europäischen Ländern oder Regionen beteiligt sind, vereinfacht. Die Deutsche Forschungsgemeinschaft (DFG) wendet Weave bereits mit dem FWF (Österreich), der FNR (Luxemburg), dem SNF (Schweiz) und der GACR (Tschechische Republik) an. Ab dem 15. September 2021 beginnt die Kooperation mit NCN (Polen).

- Within Weave, researchers from two up to three European countries or regions are able to submit a collaborative research proposal to any of the participating funders.
- To submit a proposal, all applicants must meet the eligibility requirements of their respective Weave signatory organisation.
- The Weave Lead Agency Procedure is applied to existing funding programmes, and the Weave signatory organisations will specify which funding programmes are open to Weave. It is a bottom-up mechanism, with no additional restrictions regarding the thematic focus or subject matter covered by the proposals, other than those provided for by the relevant national and/or regional funding mechanisms.
- Weave is based on the Lead Agency Procedure principle. The team of applicants selects a coordinating applicant, who submits the joint proposal to the respective Weave funding organisation in his/her country. This organisation acts as the Lead Agency for the proposal. The other applicants (co-applicants) must submit a copy of the proposal to their respective funding agencies (the Partner Agency/Agencies) within one week. The Lead Agency is responsible for the evaluation process in compliance with its internal rules set out for the respective programme. Following the assessment, it communicates its funding recommendation to the other funding organisations involved (the Partner Agencies) for approval and budgetary purposes.
- The Weave Initiative brings together twelve research funding organisations. By enabling bilateral as well as trilateral scientific cooperation within Europe, the initiative contributes to the realisation of the European Research Area. Weave will be rolled out progressively. Therefore, not all configurations for collaboration will be available under Weave immediately upon its launch. Collaboration will be allowed between selected partners and will be enlarged incrementally.

Proposals with DFG as the Lead Agency can be submitted any time. The websites of the other funding organisations involved in a proposal should be consulted as there may be important information to consider prior to submitting a proposal, e.g. eligibility requirements, deadlines, submission of additional documents, etc.

Further information is available on the DFG website.
