Africa's Development Dynamics 2021 – Digital Transformation for Quality Jobs

Africa's Development Dynamics uses lessons learned in the continent's five regions – Central, East, North, Southern and West Africa – to develop policy recommendations and share good practices. Drawing on the most recent statistics, this analysis of development dynamics attempts to help African leaders reach the targets of the African Union's Agenda 2063 at all levels: continental, regional, national and local.

The 2021 edition explores how digitalisation can create quality jobs and contribute to achieving Agenda 2063, thereby making African economies more resilient to the global recession triggered by the COVID-19 pandemic. The report targets four main policy areas for Africa's digital transformation: bridging the digital divide; supporting local innovation; empowering own-account workers; and harmonising, implementing and monitoring digital strategies.

This edition includes a new chapter examining how to finance Africa's development despite the 2020 global economic crisis.

This report results from a partnership between the African Union Commission and the OECD Development Centre.
