

ENRICH USA - Europäisches Netzwerk von Forschungs- und Innovationszentren und Drehscheiben

01.12.2019 | Netzwerke in Forschung, Technologie und Innovation

<http://usa.enrichcentres.eu/>

ENRICH is the European Network of Research and Innovation Centres and Hubs. Promoted by the European Commission through Horizon 2020. ENRICH USA acts as a central contact point for European research and innovation actors seeking to grow and reinforce collaboration across the Atlantic.

The mission of the Network is to provide standardised as well as tailor-made, research & innovation internationalisation support services to European researchers and innovators, to accelerate access to the US ecosystem, and maximise chances of success. The initiative started in April 2017 and is coordinated by the German Aerospace Center (DLR).
