

Erster Wasserstoff-Amerika-Gipfel

<https://www.hydrogen-americas-summit.com/>

Zeitraum: 08.06.2021 - 11.06.2021 Ort: online

The Sustainable Energy Council stages the inaugural Hydrogen Americas Summit taking place virtually on 8-11 June 2021.

Hydrogen is taking an increasingly prominent role in global energy discussions, and Governments, as well as companies worldwide, are announcing strategies to embrace the low-carbon fuel as a key enabler towards climate targets.

The Summit convenes Government representatives, hydrogen and energy stakeholders, service providers and end users to identify opportunities, get insights into the latest policy developments and establish new partnerships that will be crucial to drive the Region's industry forward. The time is now ripe for the economy to run on hydrogen.

More information and a link for registration can be found on the conference website.
