"Australia's National Hydrogen Strategy" (2019) sets a vision for a clean, innovative, safe and competitive hydrogen industry that benefits all Australians. It aims to position its industry as a major player by 2030.

The strategy outlines an adaptive approach that equips Australia to scale up quickly as the hydrogen market grows. It includes a set of nationally coordinated actions involving governments, industry and the community.

The Commonwealth Scientific and Industrial Research Organisation (CSIRO) published a

- "National Hydrogen Roadmap: Pathways to an Economically Sustainable Hydrogen Industry in Australia" in 2018, followed up by
- the report "Hydrogen Research, Development and Demonstration: Priorities and Opportunities for Australia" in 2019. It was developed in parallel with Australia's National Hydrogen Strategy and will support implementation of the Strategy.
