

Finnland: TIEKE - Finnish Information Society Development Center

27.01.2018 | Forschungsorganisationen und Fachgesellschaften, Netzwerke in Forschung, Technologie und Innovation, Politikberatung

<http://www.tieke.fi>

TIEKE Finnish Information Society Development Centre has a key networking role as a neutral and non-profit organisation in promoting the efforts of its members, within the public and private sectors alike, with an ultimate goal to create viable tools and expertise for use in the information society.

TIEKE´s main functions reflect the rapidly changing ICT environment in being flexible to change course from time to time according to need. As of today, TIEKE's main focus is on the development of networking and interoperability.
