UNESCO-Empfehlung zu Open Science

https://www.unesco.org/en/open-science/about

Erscheinungsdatum: 23.11.2021 | Strategiedokumente

The UNESCO Recommendation on Open Science provides an international framework for open science policy and practice that recognizes disciplinary and regional differences in open science perspectives. It takes into account academic freedom, gender-transformative approaches and the specific challenges of scientists and other open science actors in different countries and in particular in developing countries, and contributes to reducing the digital, technological and knowledge divides existing between and within countries.

Following an inclusive, transparent and multistakeholder consultative process, the UNESCO Recommendation on Open Science was adopted by the 41st session of UNESCO General Conference in November 2021.
