

Hydrogen Council (Unternehmen global)

14.12.2020 | Netzwerke in Forschung, Technologie und Innovation, Politikberatung

<https://hydrogencouncil.com/en/>

The Hydrogen Council is a global initiative of leading energy, transport and industry companies with a united vision and long-term ambition for hydrogen to foster the energy transition.

Launched during the 2017 World Economic Forum in Davos, the growing coalition of CEOs have the ambition to:

- Accelerate their significant investment in the development and commercialization of the hydrogen and fuel cell sectors.
- Encourage key stakeholders to increase their backing of hydrogen as part of the future energy mix with appropriate policies and supporting schemes.

As a group of CEOs of leading global businesses, the Hydrogen Council invites policy-makers, investors and civil society stakeholders to acknowledge the contribution and potential of hydrogen as a key element of the energy transition.
