The Argentinean-Brazilian Center of Nanoscience and Nanotechnology (CABNN - Centro Argentino Brasileño de Nanociencia y Nanotecnología) is a product of the cooperation of the Ministry of Science, Technology and Productive Innovation of Argentina and the Ministry of Science, Technology and Innovation of Brazil.

Its actions include: human resource training, exchange of professors and researchers, coordination of national networks of Nanoscience and Nanotechnology; and establishment of mixed working groups with companies to identify market niches, products and developments.
