

China: CAST - China Association for Science and Technology

10.04.2018 | Forschungsorganisationen und Fachgesellschaften

 <http://english.cast.org.cn/>

As the largest non-governmental organization of scientific and technological professionals in China, the China Association for Science and Technology (CAST) serves as a bridge that links the Communist Party of China and the Chinese government to the country's science and technology community. Through its 210 national member societies and local branches all over the country, CAST maintains close ties with millions of Chinese scientists, engineers and other professionals working in the fields of science and technology.
