Serbia participated already in the EU Research and Innovation programmes in 2007. Since then Serbia has made a lot of progress with regard to national research and innovation policies and in its participation to the relevant EU programmes. Since 2014 Serbia's performance has quadrupled making it the most successful country from the Western Balkans in Horizon 2020. Areas of particular success in Horizon 2020 include ICT and Agricultural research as well as scientific cooperation in the area of Energy. National efforts in supporting innovation have become highly successful and are complemented by a Smart Specialization Strategy.
