

IMS Intelligent Manufacturing Systems R&D program

17.02.2011 | Netzwerke in Forschung, Technologie und Innovation

 <http://www.ims.org>

IMS is an industry-led, International business innovation and research and development (R&D) program established to develop the next generation of manufacturing and processing technologies.

Companies and research institutions from the European Union, Mexico, Korea, Switzerland, and the United States of America participate as core partners in this program, but project membership is open to all on a case-by-case basis.
