

UNESCO GO-SPIN: Costa Rica – Länderinformationen zur Wissenschafts-, Technologie- und Innovationspolitik

30.05.2019 | Fachportale und -informationen

 <https://gospin.unesco.org/frontend/full-info/init.php?code=Cr>

The Global Observatory of Science, Technology and Innovation Policy Instruments (GO-SPIN) on-line platform, developed with the financial support of the Swedish government, is a source of information on STI policies and policy instruments for more than 50 developing countries across Africa, Latin America and Asia, but also a tool for monitoring, benchmarking, capacity-building and analysis. It will support evidence-based decision-making and inclusive policies towards sustainable development.

It is modelled on the Latin American-Science Policy Information Network ([SPIN](#)), a freely accessible information system, covering 33 countries in Latin America and the Caribbean (LAC).
