

Weißrussland: Nationales Portal für Wissenschaft und Technologie

14.02.2019 | Fachportale und -informationen

<http://www.scienceportal.org.by/en/>

Belarus National Science Portal is developed upon the initiative of the State Committee for Science and Technology of the Republic of Belarus in order to provide information support for international collaboration in science, technology and innovation. According to developers' idea, it should be a single entry point for Belarusian researchers to information about variable opportunities of international cooperation – programs, funds, calls for projects both in Belarus and worldwide, as well as about international events, successful stories and initiatives. It might be already useful to the Russian speaking research community and end users in the neighbor countries.
