OECD: Multidimensionale Bestandsaufnahme des Westbalkan - Von der Analyse zum Handeln

https://www.oecd-ilibrary.org/development/multi-dimensional-review-of-the-western-balkans_8824c5db-en

Erscheinungsdatum: 20.04.2022 | Fachberichte und -studien , Strategiedokumente

The report "Multi-dimensional Review of the Western Balkans - From Analysis to Action" comes as a follow-up to the earlier publication "Multi-dimensional Review of the Western Balkans: Assessing Opportunities and Constraints". It builds on an extensive peer-learning process that brought together experts from across the region and beyond. The report provides suggestions and recommendations for three strategic priorities: better education and more competencies, social cohesion, and cleaner air and more sustainable energy.

The report is part of the OECD Development Pathways series, which helps developing and emerging economies to identify innovative policy solutions to their specific development challenges.

The report is freely available in a read-only format; a subscription to the OECD iLibrary is required for download.
