The OECD Science, Technology and Innovation Outlook is a biennial publication that aims to inform policy makers and analysts on recent and future changes in global science, technology and innovation (STI) patterns and their potential implications on and for national and international STI policies.

The STI country profiles (CPs) of the OECD STI Outlook (STIO) are designed to provide a concise overview of science, technology and innovation (STI) policy and performance in OECD members and selected non-OECD economies.

OECDiLibrary subscribers have access to pdf-Download, non-subscribers to a Read-only version(2016).
