Erscheinungsdatum: Februar 2021 | Strategiedokumente

Building further on the National Strategy on AI, this approach paper, the first of two parts of the strategy titled “Towards Responsible AI for All”, aims to establish broad ethics principles for design, development and deployment of AI in India – drawing on similar global initiatives but grounded in the Indian legal and regulatory context. The strategy aims to

- enhance and empower Indians with the skills to find quality jobs;
- invest in research and sectors that can maximize economic growth and social impact; and
- scale Indian-made AI solutions to the rest of the developing world.

Within this framework, it is hoped that AI can flourish, benefitting humanity while mitigating the risks and is inclusive bringing the benefits of AI to all.
