Erscheinungsdatum: Juni 2018 | Strategiedokumente

The report "Towards an AI Strategy in Mexico: Harnessing the AI Revolution" surveys the current state of AI in Mexico, details relevant policies already in place, and describes potential use cases for AI at the national and regional level. Based on evidence from over 60 interviews with local AI experts, the report concludes with a set of recommendations grouped into five categories:

- government and public services,
- data and digital infrastructure,
- research and development,
- capacity, skills and education, and
- ethics.
