

EUREKA-Veranstaltung: Verbesserung der transatlantischen Zusammenarbeit bei Künstlicher Intelligenz

🔗 <https://www.eurekanetwork.org/content/enhancing-transatlantic-cooperation-artificial-intelligence>

Zeitraum: 03.07.2019 Ort: Brüssel Land: Belgien

This event organised by the [Center for Data Innovation](#) will aim to discuss the opportunities for cooperation and collaboration between the United States, Canada, and the EU as they pursue artificial intelligence (AI) strategies, and the ways in which policymakers and stakeholders can enhance these efforts.

Countries competing to be leaders in artificial intelligence technologies are in competition with China, which would put them at a disadvantage across key sectors of the economy. Given this challenge, it may be time to strengthen the historic economic partnerships between North America and Europe with a new focus on AI.

The speakers will talk about the opportunities to deepen research ties, coordinate government projects, promote global standards, and protect common values for their citizens and businesses.

[Registration](#) is free of charge.
